In line 1, the recitation – the propagation of plants is conducted in – has been added after the word “wherein”, the words “for the” have been deleted; in line 2, the words “propagation of plants” have been changed to – which further --.

J. On page 6 of the response filed October 20, 2005, claim 65 has been amended as follows:
The following recitation has been added after “64,” – wherein the propagation of plants is conducted in the float bed apparatus and --.

K. On page 6 of the response filed October 20, 2005, claim 66 has been amended as follows:
The following recitation has been added after “64,” – wherein the propagation of plants is conducted in the float bed apparatus and --.

L. On page 6 of the response filed October 20, 2005, claim 67 has been amended as follows:
The following recitation has been added after “64,” – wherein the propagation of plants is conducted in the float bed apparatus and --; in line 3, the word “of” has been changed to – having--.

M. On page 7 of the response filed October 20, 2005, claim 68 has been amended as follows:

Art Unit: 1661

The following recitation has been added after “64,” – wherein the propagation of plants is conducted in the float bed apparatus and --.

N. On page 7 of the response filed October 20, 2005, claim 69 has been amended as follows:

The following recitation has been added after “64,” – wherein the propagation of plants is conducted in the float bed apparatus and --.

REASONS FOR ALLOWANCE

The following is an examiner’s statement of reasons for allowance: the closest prior art documents representing the additional claim limitations are Koike (United States Patent Number 4,607,454) and Valstar (United States Patent Number 5,561,943. Koike does not teach or suggest the use of somatic embryos in the float bed apparatus taught, nor does he teach or suggest moving the float bed along another apparatus as the plants mature.

Valstar teaches an apparatus for moving plants, but does not teach or suggest using the apparatus in a hydroponic culture system. Additionally, Valstar’s apparatus is used to move

Art Unit: 1661

plants to other locations after maturity; Valstar does not teach or suggest moving the plants as they mature so that they reach their destination at the time of maturity.

Neither of the reference teaches the propagation of *Arundo donax*, nor is there any motivation to thus propagate *Arundo donax* by placing plantlets obtained from either somatic embryogenesis or asexual propagation into a continuous float bed apparatus that moves the plants to a designated destination as they reach maturity. As such, the closest prior art references do not anticipate or make obvious the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
